

Product Documentation

Use cases, application notes, and documentation for related products such as Conduit gateway and the LoRa accessory card are available on the MultiTech developer site at: www.multitech.net/

For the mDot Developer Guide go to:
www.multitech.net/developer/products/multiconnect-mdot

The mDot ships from the factory pre-loaded with our custom AT Command Firmware. For more information go to:
<https://developer.mbed.org/platforms/MTS-mDot-F411/#factory-firmware>

Safety and Regulatory Content

For safety and regulatory content, refer to the mDot Developer Guide.

Using the mbed Platform

The mbed platform provides free software libraries, hardware designs and online tools for professional rapid prototyping of products based on ARM microcontrollers.

The platform includes a standards-based C/C++ SDK, a microcontroller HDK and supported development boards, an online compiler and online developer collaboration tools.

**MultiConnect® mDot™ with Micro Developer Kit
MTMDK-ST-MDOT Quick Start**

Welcome

This Quick Start includes information on the MultiConnect® mDot™ and the Micro Developer Kit.

MultiConnect mDot

The MultiConnect mDot is a secure, programmable, long-range and low-power RF module that provides encrypted data connectivity to sensors, industrial equipment, and remote appliances.

The mDot features an integrated ARM® Cortex® -M4 processor and mbed compatible software library for developers to control, monitor, and bring edge intelligence to their Internet of Things (IoT) applications.

Micro Developer Kit

Designed specifically for mDot development, the Micro DK plugs directly into a USB port on your computer making it easy to use the developer kit for testing, programming, and evaluating your application.

Note: To work with the developer board, you need an X1P mDot model which includes a programming header.

Developer Kit Package Contents

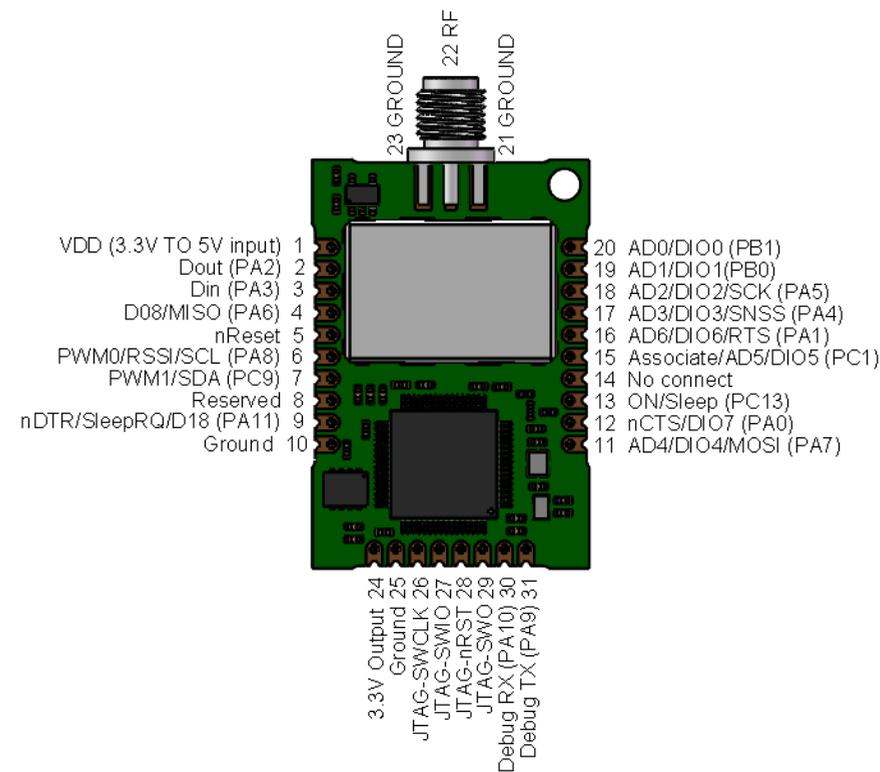

Your Developer Kit (MTMDK-ST-MDOT) includes the following:

Developer Board	1 - MTMDK mDot Developer Board
Antenna	1 - 868-945 MHz LoRa Antenna
Cable	1 - Programming Cable
Customer Notices	This Quick Start

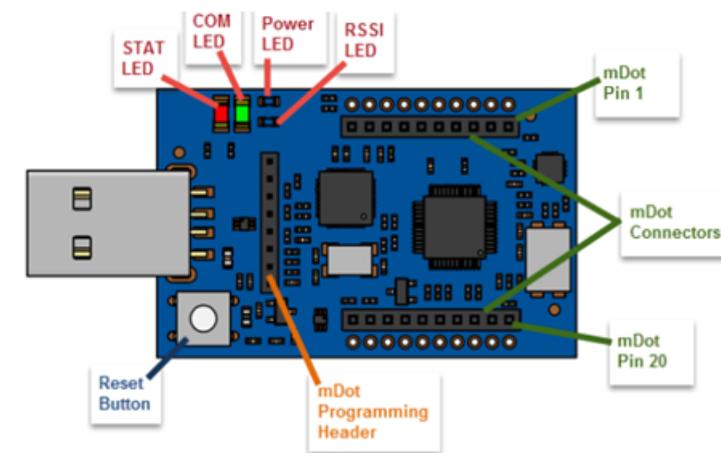

Update your developer board ST-LINK/V2 firmware through the mDot mbed page at

<https://developer.mbed.org/platforms/MTS-mDot-F411/#general-technical-references>

mDot Pinout

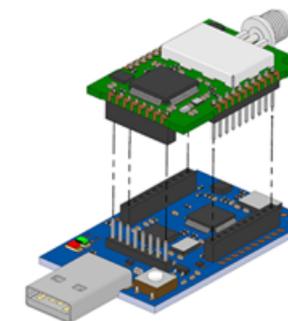

Developer Board Components

Note: The Reset Button resets the mDot processor.

Mounting an mDot (MTDOT) on the Micro DK

To install an mDot:

1. Align the mDot on the developer board as shown.
2. Gently press the mDot into the connectors.
